

MOHD. SAYEM LARI

Software / Full-Stack Developer — AI/ML Specialization

8957016247 | 2k25aiml2512104@gmail.com | linkedin.com/in/sayem-lari-966862396 | github.com/sayem23ai

EDUCATION

Pranveer Singh Institute of Technology

Expected Graduation: 2029

B.Tech — Computer Science & Engineering (Specialization: Artificial Intelligence & Machine Learning)

Semester 1 SGPA: 7.18 | Semester 2 SGPA: 7.05 | Approx. cumulative average: 7.12/10 (not an official university-issued CGPA)

TECHNICAL SKILLS

Strong / Comfortable:	C, C++, HTML, CSS, React, Tailwind CSS
Used / Familiar:	JavaScript, FastAPI, Git, GitHub, EasyOCR, OpenCV, VS Code
Currently Learning:	Python, Java, PyTorch

EXPERIENCE

Web Developer — Client Project

Shams Talent Management Services

shamstalentmanagementservices.com

- Independently developed and deployed the complete responsive frontend, implementing interactive animations and production-ready UI (no backend).
- Implemented the website's contact workflow and managed deployment, taking the client project from development through public release.

PROJECTS

JalDrishti

[GitHub](#) | [Live Demo](#)

Water-disaster reporting & monitoring platform with citizen reporting, disaster classification, map-based visualization, and severity/status tracking.

- Contributed to integration work on the platform; implemented and integrated the x402 protocol as a separate competition requirement.

Coastal Social

[GitHub](#) | [Live Demo](#)

Simulated social-media app demonstrating ML-based detection of water-disaster images, forwarding incidents to JalDrishti as reports.

- Built both frontend and backend, and integrated the end-to-end social-post-to-disaster-report workflow with JalDrishti.

Swasthya Setu

[GitHub](#)

- Trained an OCR/ML pipeline (EasyOCR, OpenCV) to read medicine names, identify medicine types, and extract information from medical reports.

ResNet from Scratch in PyTorch (*In Progress*)

- Implementing ResNet in PyTorch from the original paper — convolutional layers, residual blocks, and skip connections — training and evaluating on CIFAR-10.

ACHIEVEMENTS

Build with Bharat 2.0 — NIT Delhi

Semi-Finalist

[GitHub](#)

Semi-finalist with JalDrishti, a water-disaster reporting & monitoring platform (see Projects).

OOSC 4.0 — IIT Allahabad

Shortlisted

[GitHub](#)

Shortlisted with EquiLearn, an AI-powered learning platform offering AI tutoring, quizzes, PDF-based RAG for study material, and personalized learning support.
